

Recommendations

1. Request that the State Controller's Office conduct a special audit to assess the use of contract staff and services at the California State Lottery, the extent to which these services are used in comparison with similar agencies, and to assess the risk of conflict of interest if contractors are in a position to impact the hiring of other contractors.
2. Ask the State Auditor to investigate allegations of anomalies in draw procedures impacting the outcome of games, and, if substantiated, to recommend a proper course of action for the Legislature.
