This language was pertinent when the OIG conducted dozens of "investigations" annually, but to require a report each quarter for only one or two reviews is fiscally burdensome on the OIG with no corresponding value.	X

X
0820	Department of Justice/Office of the Attorney General - DAS	Bill Organized Crime in California Report: The annual report, enacted in 1972, to the Legislature, federal, state, and local law enforcement agencies, and other interested groups on accomplishments and efforts of DOJ to suppress organized crime	Government Code section 15028	Annually by July 1	Delete reporting requirement in light of the recent reductions to the Division of Law Enforcement.	X
0820	Department of Justice/Office of the Attorney General - DAS	Workers' Comp Fraud	Insurance Code section 1872.83 (e)(2)	Annually	Delete reporting requirement. This code section and reporting requirement was enacted in 1995 through SB 619. At the time, there was concern that DAs were not adequately or aggressively prosecuting instances of insurance fraud, including workers' comp. To create an incentive for the locals DAs to prosecute, this legislation allowed the AG to apply for funding to take on the responsibility for prosecution if a local DA failed to adequately prosecute such cases. If DOJ obtained funding, an annual report was then required to document use of the funds. DOJ has never received such funding in the 16 years this legislation has been active; therefore, no report has ever been submitted.	X
0820	Department of Justice/Office of the Attorney General - DAS	Anti-Reproductive-Rights Crimes in California - Senate Bill 780, effective January 1, 2002, enacted two new laws: the California Freedom of Access to Clinic and Church Entrances (or California FACE) Act, and the Reproductive Rights Law Enforcement Act. It also mandates this annual report to the Legislature to include information such as the number of crime events, types of offenses, level of offense, weapons, location of the crime, race/ethnicity, gender, and age of victims and suspects	Penal Code section 13777	Annually	Delete reporting requirement as required information is of limited value. Between 2003 and 2010, ten or fewer Anti-Reproductive-Rights Crimes have been reported to the Department of Justice each year by law enforcement agencies. Because so few crimes are reported, it is difficult to justify the effort to produce the report. While in 2008 legislation was passed that no longer required the Department of Justice to analyze and report on anti-reproductive-rights crimes, the Department is still required to collect the data and post the information on the Attorney General's web site. (2) In addition to the biannual reports, DOJ is also required to make a separate report of each settlement as it occurs. There have been several settlements during each reporting period	Government Code section 16428.6	(1) Biannual (2) Following each settlement, several times per year. The report should still be required, but responsibility for this report should be shifted to the Department of Forestry.	X

While the Legislative Counsel Bureau sites three different reporting requirements (GC 6210, GC 6210 (c) and GC 6216), it would make sense to consolidate these three reporting requirements, since all three are covered in a single report provided by January 10 of each year.	X

The required information is no longer of value because the Revised Article Nine legislation (RA9) has been in effect for nearly eleven years and absent legislative or regulatory changes, this report is unchanged and will remain so, except to reflect legislative or regulatory changes. For this reason, the report may be considered obsolete.	X
0890	Secretary of State	To Legislature - Safe at Home Applications Report - Participation - numbers and mailings. Total number of pieces of mail forwarded to program participants, explanation of targeted changes to improve efficiency	Government Code 6210 (c)	One-time only	Delete reporting requirement. 1760	Department of General Services	Report on contractors' complaints received (progress payments). Requires all State agencies, including DGS, to report on the number and dollar volume of written complaints of progress payment violations received from subcontractors and prime contractors on contracts in excess of three hundred thousand dollars (\$300,000)	Public Contract Code 10262.5	Annually	Delete reporting requirement. DGS recommends this report be deleted from the Legislative Counsel list as the information is not of much value. Since the implementation of Public Contract Code Section 10262.5, there have been substantial gains in the electronic record keeping of payments by the State to contractors. Over 80 percent of complaints received at DGS are resolved within the reporting year of the stop notice submittal. The report becomes insignificant at the time of submittal to the Legislature as most all outstanding payments are already resolved. Presumably there would be even less need for stop notice action, eliminating available data for a report, if subcontractors were more familiar with the readily available information on the progress payments website. See Progress Payments website through www.eProcures.dgs.ca.gov .	X

X
3860	Department of Water Resources	Expenditures and Commitments for flood projects using funding from Proposition 1E (This report was requested at the onset of the expenditure of bond funds from Propositions 1E.)	Water Code Section 5096.829, enacted by SB 85 (Ch. 178, Stats. of 2007)	Quarterly beginning November 2007, until funds are liquidated	Delete Reporting Requirement. The FISMA (Financial Integrity and State Manager's Accountability Act) report is basically an internal exercise with no affect or consequence for non-complying state agencies. DWR management is actively involved in the assessment and strengthening of internal controls through continuous monitoring, audits, and evaluations performed regularly by internal and external (public and private) auditors. When audit reports are issued and findings or observations noted, management and the Agency ensure that the systems are reviewed and strengthened (if applicable) to minimize fraud, errors, and waste of government funds.	X
3860	Department of Water Resources	California Energy Resources Scheduling - Information relating to the purchase and sale of electric power (This report relates to the post-2000 energy crisis activities of DWR in purchasing power for investor-owned utilities. The last of the power contracts administered by CERS terminates in 2015, at which point these reports would cease.)	Water Code Section 80250, enacted by AB X1 1 (Ch. 4, Stats. of 2001)	Annually and Quarterly	Delete Reporting Requirement. Section 138.9 provides that, if DWR is not required to implement the Record of Decision (ROD), then the report need not be prepared. The State is not moving forward with implementation of the CALFED ROD, therefore removing this potentially confusing section of law would clarify the codes.	X

3860	Department of Water Resources	Accounting and Administrative Control Systems - Report on internal accounting controls and include recommendations to correct inadequacies	Government Code Section 13405	December 31 of odd numbered years	Delete Reporting Requirement. Section 162 declares legislative intent that for determinations, policies, and procedures, the DWR director and the CWC be in agreement "whenever possible," and as such, requested this report of instances where they are not in agreement. At the time of the drafting of this statute, the CWC was intimately involved in the activities of the department because of its involvement in the development and construction of the State Water Project. This is no longer the case, the reporting requirement is antiquated, and should therefore be eliminated.	X
3860	Department of Water Resources	CALFED Bay-Delta Program, Programmatic Record of Decision - Report on progress toward meeting the goals	Water Code Section 138.9	January 1, 2003 and annually thereafter	Delete Reporting Requirement. This reporting requirement pertains to the Clean Water Bond Law of 1984 and is no longer necessary. In the interest of cleaning up the codes, this should be eliminated.	X
3860	Department of Water Resources	Report on Disagreements between the DWR Director and the California Water Commission. (DWR has no information regarding whether or not ANY such report has ever been filed.)	Water Code Section 162	None	Delete Reporting Requirement. 3860	Department of Water Resources	Applications for construction of Safe Drinking Water projects (This reporting requirement pertains to the Clean Water Bond Law of 1984.)	Water Code Section 13822	None	Delete Reporting Requirement. This reporting requirement pertains to the California Safe Drinking Water Bond Law of 1986 and is no longer necessary. In the interest of cleaning up the codes, this should be eliminated.	X
3860	Department of Water Resources	Applications for Grants for domestic water systems in excess of \$100,000 (This reporting requirement pertains to the Clean Water and Water Conservation Bond Law of 1978.)	Water Code Section 13884	None	Delete Reporting Requirement. This report is nearly identical to the Greenhouse Gas Emissions Reductions report that is required annually by Water Code Section 142, and as such DWR is no longer submitting this report. While no statutory change is required, since the report is "required" semiannually, some acknowledgement that the report need not be continued would be beneficial.	X
3860	Department of Water Resources	Applications for grants to public agencies for construction of domestic water systems (This reporting requirement pertains to the California Safe Drinking Water Bond Law of 1986.)	Water Code Section 13896.2	None	Delete Reporting Requirement. This report was requested at the onset of the expenditure of bond funds from Propositions 1E and 84 for flood activities. DWR has received no feedback concerning problems with the expenditure of these funds and both the Natural Resources Agency and DWR maintain information on their websites concerning the expenditure of bond funds. While no statutory change is required to eliminate the report, that fact that the initial report requirement was for quarterly reporting, some acknowledgement that the report need not be continued would be beneficial.	X
3870	California Bay-Delta Authority	The state's efforts in acquiring long-term purchase contracts and permanent water rights	Section 79555 of the Water Code	Annually to the Legislature	Delete Reporting Requirement. Report no longer necessary.	X

The report is to put forward recommendations for accelerating the deployment of hydrogen fuel use. After the initial report was completed in 2005, there hasn't been any further efforts and there is not adequate resources to devote to this effort.	X

4700	Community Services and Development	"Heat and Eat" Program (Should the demand for the nominal Low Income Home Energy Assistance Program (LIHEAP) service benefit exceed allocated funding established in the LIHEAP state plan, the DCSD and the DSS shall report to the Legislature and develop a plan to maintain the program as intended.)	Welfare and Institutions Code Sec. 18901.2 (b)(3)	Per Occurrence	This reporting requirement should be eliminated. This issue can be discussed at budget hearings if this specific situation occurs. Note: This same report is also listed under the Department of Social Services (Org 5180).	X
5160	Department of Rehabilitation	Programs and Activities of the Division of Specialized Services to the Blind and Visually Impaired and Deaf and Hard of Hearing: Includes statistics on competitive employment placements of persons who are blind or visually impaired	Section 19098 of the Welfare and Institutions Code	On or before July 1, 2005 and every other year thereafter	This reporting requirement should be eliminated. Information is already required for federal reporting requirements and is available publically through the Federal Rehabilitation Services Administration (RSA) Standards and Indicators report, and the Federal RSA website.	X
5160	Department of Rehabilitation	Performance Data Reports (Report on rehabilitation services performance data for prior year)	Section 19106 of the Welfare and Institutions Code	Annual	This reporting requirement should be eliminated. The required information is no longer relevant to the performance standards. X
5175	Department of Child Support Services	California Child Support Automation System (CCSAS) - Requires DCSS to submit an annual report by March 1 on the ongoing implementation of CCSAS	Section 17561 of the Family Code	Annually on March 1, beginning in 2010	This reporting requirement should be eliminated. CCSAS has been fully implemented and the requirement is duplicative of a federal reporting document. DCSS documents all system changes in the Advanced Planning Document Update. DCSS can share with the Legislature upon request. At the time that the reporting requirement was established, the system had just been implemented. Also, this information is redundant with information contained in federal automation planning documents.	X
5175	Department of Child Support Services	Information relating to county child support enforcement programs	Section 17600 of the Family Code	Annual report: On or before June 30, of each fiscal year; Semiannually: On or before December 31, of each fiscal year	This reporting requirement should be eliminated. The reporting changes to CCSAS have not yet been made--incorporating the required reporting elements into CCSAS would result in significant programming costs and staff time which would delay implementation of a number of high priority system changes in the queue required to meet federal requirements. The primary users of this child support data are the Local Child Support Agencies (LCSAs). The data outlined in FC 17600(d) and (e) have not yet been added to the reporting structure. A Case Management Tool has been developed and made available to all the LCSAs through the Department's secure website. This tool enables the counties to query or pull the data they would like to access, including many of the new requirements identified in FC 17600 (d) and (e).	X

5175	Department of Child Support Services	Performance data on child support collections (Requires report of performance data on child support collections within 60 days of the end of each quarter, to be posted on the department's website)	Section 17601 of the Family Code	Within 60 days of the end of each quarter	This reporting requirement should be eliminated. The reporting changes to CCSAS have not yet been made--incorporating the changes would create added cost pressure and require more personnel already dedicated to implementing the programming changes required to meet federal compliance. Information can be provided at the county level if requested.	X
5175	Department of Child Support Services	Report on status of state child support enforcement program	Section 17602 of the Family Code	Semiannually, beginning July 1, 2001	This reporting requirement should be eliminated. CCSAS provides DCSS and the Local Child Support Agencies (LCSAs) with readily available data reporting with enhanced reporting capabilities that allow for trend analysis of data. The primary users of this child support data are the LCSAs. A Case Management Tool has been developed and made available to all the LCSAs through the Department's secure website. This tool enables the counties to query or pull the data they would like to access; in addition, DCSS shares performance data with the LCSAs on a regular basis through meetings and communications.	X
5175	Department of Child Support Services	Child Support Performance (Report on progress of all local child support agencies in each performance measure, including identification of the local child support agencies that are out of compliance, the performance measures that they have failed to satisfy, and the performance improvement plan that is being taken for each)	Section 17602 of the Family Code	Semiannually	This reporting requirement should be eliminated. CCSAS provides DCSS and the Local Child Support Agencies (LCSAs) with readily available data reporting with enhanced reporting capabilities that allow for trend analysis of data. The primary users of this child support data are the LCSAs. A Case Management Tool has been developed and made available to all the LCSAs through the Department's secure website. This tool enables the counties to query or pull the data they would like to access; in addition, DCSS shares performance data with the LCSAs on a regular basis through meetings and communications.	X
5175	Department of Child Support Services	Comprehensive data from the state hearing pilot project that demonstrates that the pilot has reduced state hearings and a description of how the pilot's revised hearing process results in the estimated savings to state hearing costs	Section 38 of Chapter 759 of the Statutes of 2008	On or before January 1, 2009	This reporting requirement should be eliminated. This was a one-time requirement, and there does not appear to be a compelling need to retain the requirement.	X
5175	Department of Child Support Services	Revenue Stabilization (Requires DCSS to submit a report on the impact and effectiveness of Revenue Stabilization augmentation funds)	Section 17555 of the Family Code	January 1, 2010, Spring 2010, and annually thereafter	This reporting requirement should be eliminated given that prior reports demonstrate the augmentation has stabilized collection revenue. The DCSS can report on the effectiveness of the augmentation in Legislative budget hearings or as requested by the Legislature. This augmentation has been in place since 2009 and there is a premise line for this item in the DCSS Local Assistance Estimate.	X
5175	Department of Child Support Services	Effect of the Ten Dollar (\$10.00) Payment - Declaration of Paternity Form.	Section 7571(g) of the Family Code	By January 1, 2000	This reporting requirement should be eliminated. This was a one-time study completed in 2000.	X

5180	Department of Social Services	Cost of Doing Business (CODB) - (The DSS, in consultation with CWDA, is required to develop a CODB survey to capture the costs for county administration to determine whether those costs are reasonable and necessary to meet program requirements and objectives. Commencing with the May Revision of the 2007-08 budget, and annually thereafter, requires the department to identify in its budget documents the estimates developed pursuant to this section and the difference between these estimates and the proposed funding levels.)	W&I Code 10507	Annually in DSS' May Revision Local Assistance Estimate	This reporting requirement should be eliminated. The DSS is required to include the CODB cost estimates in its budget documents, but it is of limited value; the data comes from the counties but is not validated or verified at the state level. In addition, 2011 Realignment shifted the fiscal responsibilities of children's programs to counties (CalWORKs, CalFresh, and IHSS are included on the report and have not been realigned). Continuing this requirement would only create unnecessary workload for the DSS.	X
5180	Department of Social Services	Private Adoption Agency Reimbursement Program (PAARP) - (Requires costs and savings associated with increasing the reimbursement rate and outcome data related to adoption placements and finalized adoptions.)	W&I Code Section 16122	Annually	This reporting requirement should be eliminated. The data can be provided upon request.	X

SB 84 Chapter 177, Statutes of 2007, Section 41	One-Time	This reporting requirement should be eliminated as this information is regularly reported at legislative budget hearings and this appears to have been a one-time requirement.	X
5180	Department of Social Services	Child Day Care Facility Complaints - (Requires information on the number of complaints resolved and referred, any related follow-up activities, and the number of facilities visited.)	Health & Safety Code 1596.872a	Annually	This reporting requirement should be eliminated. The data can be provided upon request.	X
5180	Department of Social Services	Automated Child Abuse Reports - (Requires the DSS to submit a report to the counties and the Legislature that reflects data indicating the reasons as to why an automated one-time report was filed in lieu of an initial telephone report.)	Penal Code 11166	One-Time, three years after the subdivision becomes inoperative or on January 1, 2009, whichever occurs first.	This reporting requirement should be eliminated. This report was never completed because necessary changes to the Child Welfare Services/Case Management System (IT system) were never made.	X

X

W&I Code 11462	Annually	This reporting requirement should be eliminated given the December 2009 court order providing group homes a significant increased rate. The intent of the report was to identify group home cost increases that were not reflected in their rate.	X
5180	Department of Social Services	Safely Surrendered Baby Law Report - (Requires DSS on or before January 1, 2013, contingent upon the availability of funding or resources, to report to the Legislature annually regarding the effects of the safely surrendered baby law.)	AB 1048 Chapter 567, Statutes of 2010	Annually	This reporting requirement should be eliminated given that funding has not been provided for this specific activity. Additionally, some provisions require data that neither the state nor counties have available.	X
5180	Department of Social Services	AB 98 Reporting Requirements for Subsidized Employment in CalWORKs - (This report is to inform Legislature on the outcomes of implementing AB 98.)	W&I Code 1322.63 AB 98 Chapter 589, Statutes of 2007	One-Time - ABX4 4 extended report date two years to 1/10/13.	This reporting requirement should be eliminated. Data can be provided upon request and can be reported by the DSS at budget hearings.	X

W&I Code 12305.84	One-Time	This reporting requirement should be eliminated. Although this report was never completed, the stakeholder group has met and future meetings will occur. The current PAs and NPCs have been established for years.	X
